PERSONAL STATEMENT

I'm a Software Developer with experience in technologies such as TypeScript, Node.js and React. I'm passionate about learning new things and creating useful products. My knowledge goes from software development to DevOps with Docker and Linux.

WORK EXPERIENCE

Frontend Developer
@Octaldev
Feb/2022 - Jan/2023

Development of an e-commerce platform, an administration portal, a basic CMS, company internal libraries and boilerplates using TypeScript, React, Next and Sass. Deployment of applications through GitLab CI/CD and Trunk-Based Versioning. Test development with Jest and React Testing Library.

Software Engineer
@Self employed
Dec/2020 - Present

Development of tools for developers, including projects such as gen-readme, themes like min-theme, and games like react-jokenpo. Deliver solutions for competitive projects such as rinha-backend-go. Using technologies such as React, TypeScript, Go, PostgreSQL, Rust, and actively contributing to open-source projects using cutting-edge technologies like Node, Bun, Deno, among others.
